## TYPES OF PISTACHIO (including sizes)

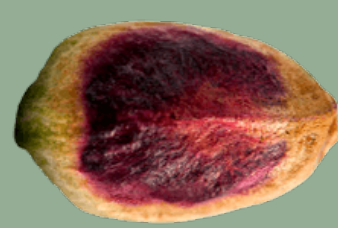

(1) 20/22  
(2) 22/24  
(3) 24/26

Long Akbari

(1) 24/26  
(2) 26/28  
(3) 28/30

Long Ahmad Aghaei

Kernel

(1) 20/22  
(2) 22/24  
(3) 24/26

Jumbo  
(Kalle ghochi)

(1) 26/28  
(2) 28/30  
(3) 30/32

Round (Fandoghi)

Closed shell

## PHYSICAL FEATURES OF PISTACHIOS:

**Size** Pistachios are relatively small nuts, typically around 1 inch or 2-3 cm long. They have an oblong shape and a slightly pointed tip.

**Color** The outer shell of a pistachio is beige in color, while the inner nut has a distinguishable light greenish or sometimes slightly yellowish hue. This inner nut is often referred to as the "pistachio kernel."

**Texture** The outer shell is a bit tough and requires cracking to reveal the edible kernel inside. The kernel itself has a slightly firm yet tender texture.

**Shape** Pistachios have a somewhat elongated shape, with a natural opening along one side that allows access to the kernel inside.

These physical characteristics, along with their delicious taste and nutritional value, make pistachios a beloved and versatile nut in the culinary world.

## TYPES OF KERNELS

---

Green Kernel

Split Kernel

Whole Kernel

Half Split Kernel

kernels are the edible seeds found inside the shells of pistachio nuts. They have a beige or light green color and are known for their rich, slightly sweet flavor. These kernels can be enjoyed as a snack on their own, added to various dishes such as desserts, or used as a topping for salads. They are also a good source of protein, healthy fats, and various nutrients, making them a popular and nutritious choice for culinary applications. Additionally, they are often used in confectionery and baking due to their pleasant taste and vibrant color.
